

Blue Seventy 2013 Men's 2013 Fusion Wetsuit

The Fusion offers a perfect blend of price and performance. The unique buoyancy profile offers thicker leg panels helping to elevate the legs and the 1.5mm A-Flex arms and soft Yamamoto neoprene contribute to the flexibility of this suit.

The Fusion is designed to offer the best blend of flexibility, durability, and comfort offering a high value for any price conscious customer.

BUOYANCY: The Fusion tiers buoyancy 3-4-4 with less overall buoyancy than the Reaction and Helix suits, but the ratio of buoyancy between the lower body and upper torso creates an optimal body position.

CHEST: RATING 3mm Yamamoto SCS 3mm Neoprene 3 mm chest panel, offers excellent chest buoyancy, as well as comfort.

TORSO & LEGS: RATING 4mm Yamamoto panels in the hips and legs focuses buoyancy in this area lifting the lower half of the body up and into alignment with the chest and head. This improvement in body position creates less drag by improving body position improving speed, and conserving energy.

FLEXIBILITY: Our A – FLEX Orange Jersey highlights in the 1.5mm arms, and underarm gussets maximizes the performance of the suits arms, creating superb flexibility.

LOWERED COLLAR: Our curved closure flap reduced rear collar height improving comfort and reducing chaffing

QUICK EXIT LEGS PANEL: 2mm A – FLEX material located in a quick exit panel at the back of the leg improves transition times.

A- GRIP PANELS: A textured forearm print onto our high stretch jersey allows the swimmer extra feel for the water and additional grip in the propulsion phase of the stroke.
